

SERVICES OVERVIEW · 2026

What We Build

We design, build, and secure the technology businesses run on.

Revaluar.com

OUR POSITIONING

We design, build, and secure the technology businesses run on.

Digital products, enterprise systems, AI, infrastructure, and cybersecurity - from strategy to deployment.

Built in Vancouver. Delivering worldwide.
Global technology experience. Hands-on execution.

SECTION ONE

About Revaluar

01

**Built in
Vancouver.
Delivering
worldwide.**

GLOBAL + HANDS-ON

Global technology experience. Hands-on execution.

Revaluar's leadership brings engineering experience from global technology companies together with hands-on delivery for clients around the world.

END-TO-END

Strategy → Deployment → Support

GLOBAL

HANDS-ON

The problems we solve.

Scattered systems: Software, spreadsheets and manual processes that don't talk to each other.

No clear roadmap: Technology decisions made reactively, without a plan tied to business goals.

Stalled digital products systems: Ideas that never leave the whiteboard, or platforms that launch and stagnate.

Security as an afterthought: Infrastructure and data exposed because security was bolted on, not built in.

SECTION TWO

Our Services

02

WHAT WE OFFER

Five pillars. One partner.

STRATEGY

01

Strategy & Digital Transformation

Roadmaps, audits & solution architecture for your digital evolution

SOFTWARE

02

Software & Digital Products

Web, mobile & platform engineering built for real operations

ERP & SYSTEMS

03

ERP & Enterprise Systems

Implementation, integration & automation across the business

AI & DATA

04

AI, Data & Automation

Agents, assistants & analytics embedded into your workflows

INFRASTRUCTURE

05

Infrastructure & Cybersecurity

Networks, cloud & security built to enterprise standards

Strategy & Digital Transformation

WHAT WE DELIVER

Digital Readiness Assessment

Audit systems, processes & people to identify gaps and opportunities

Transformation Roadmap

A phased, prioritized plan that ties technology investment to business goals

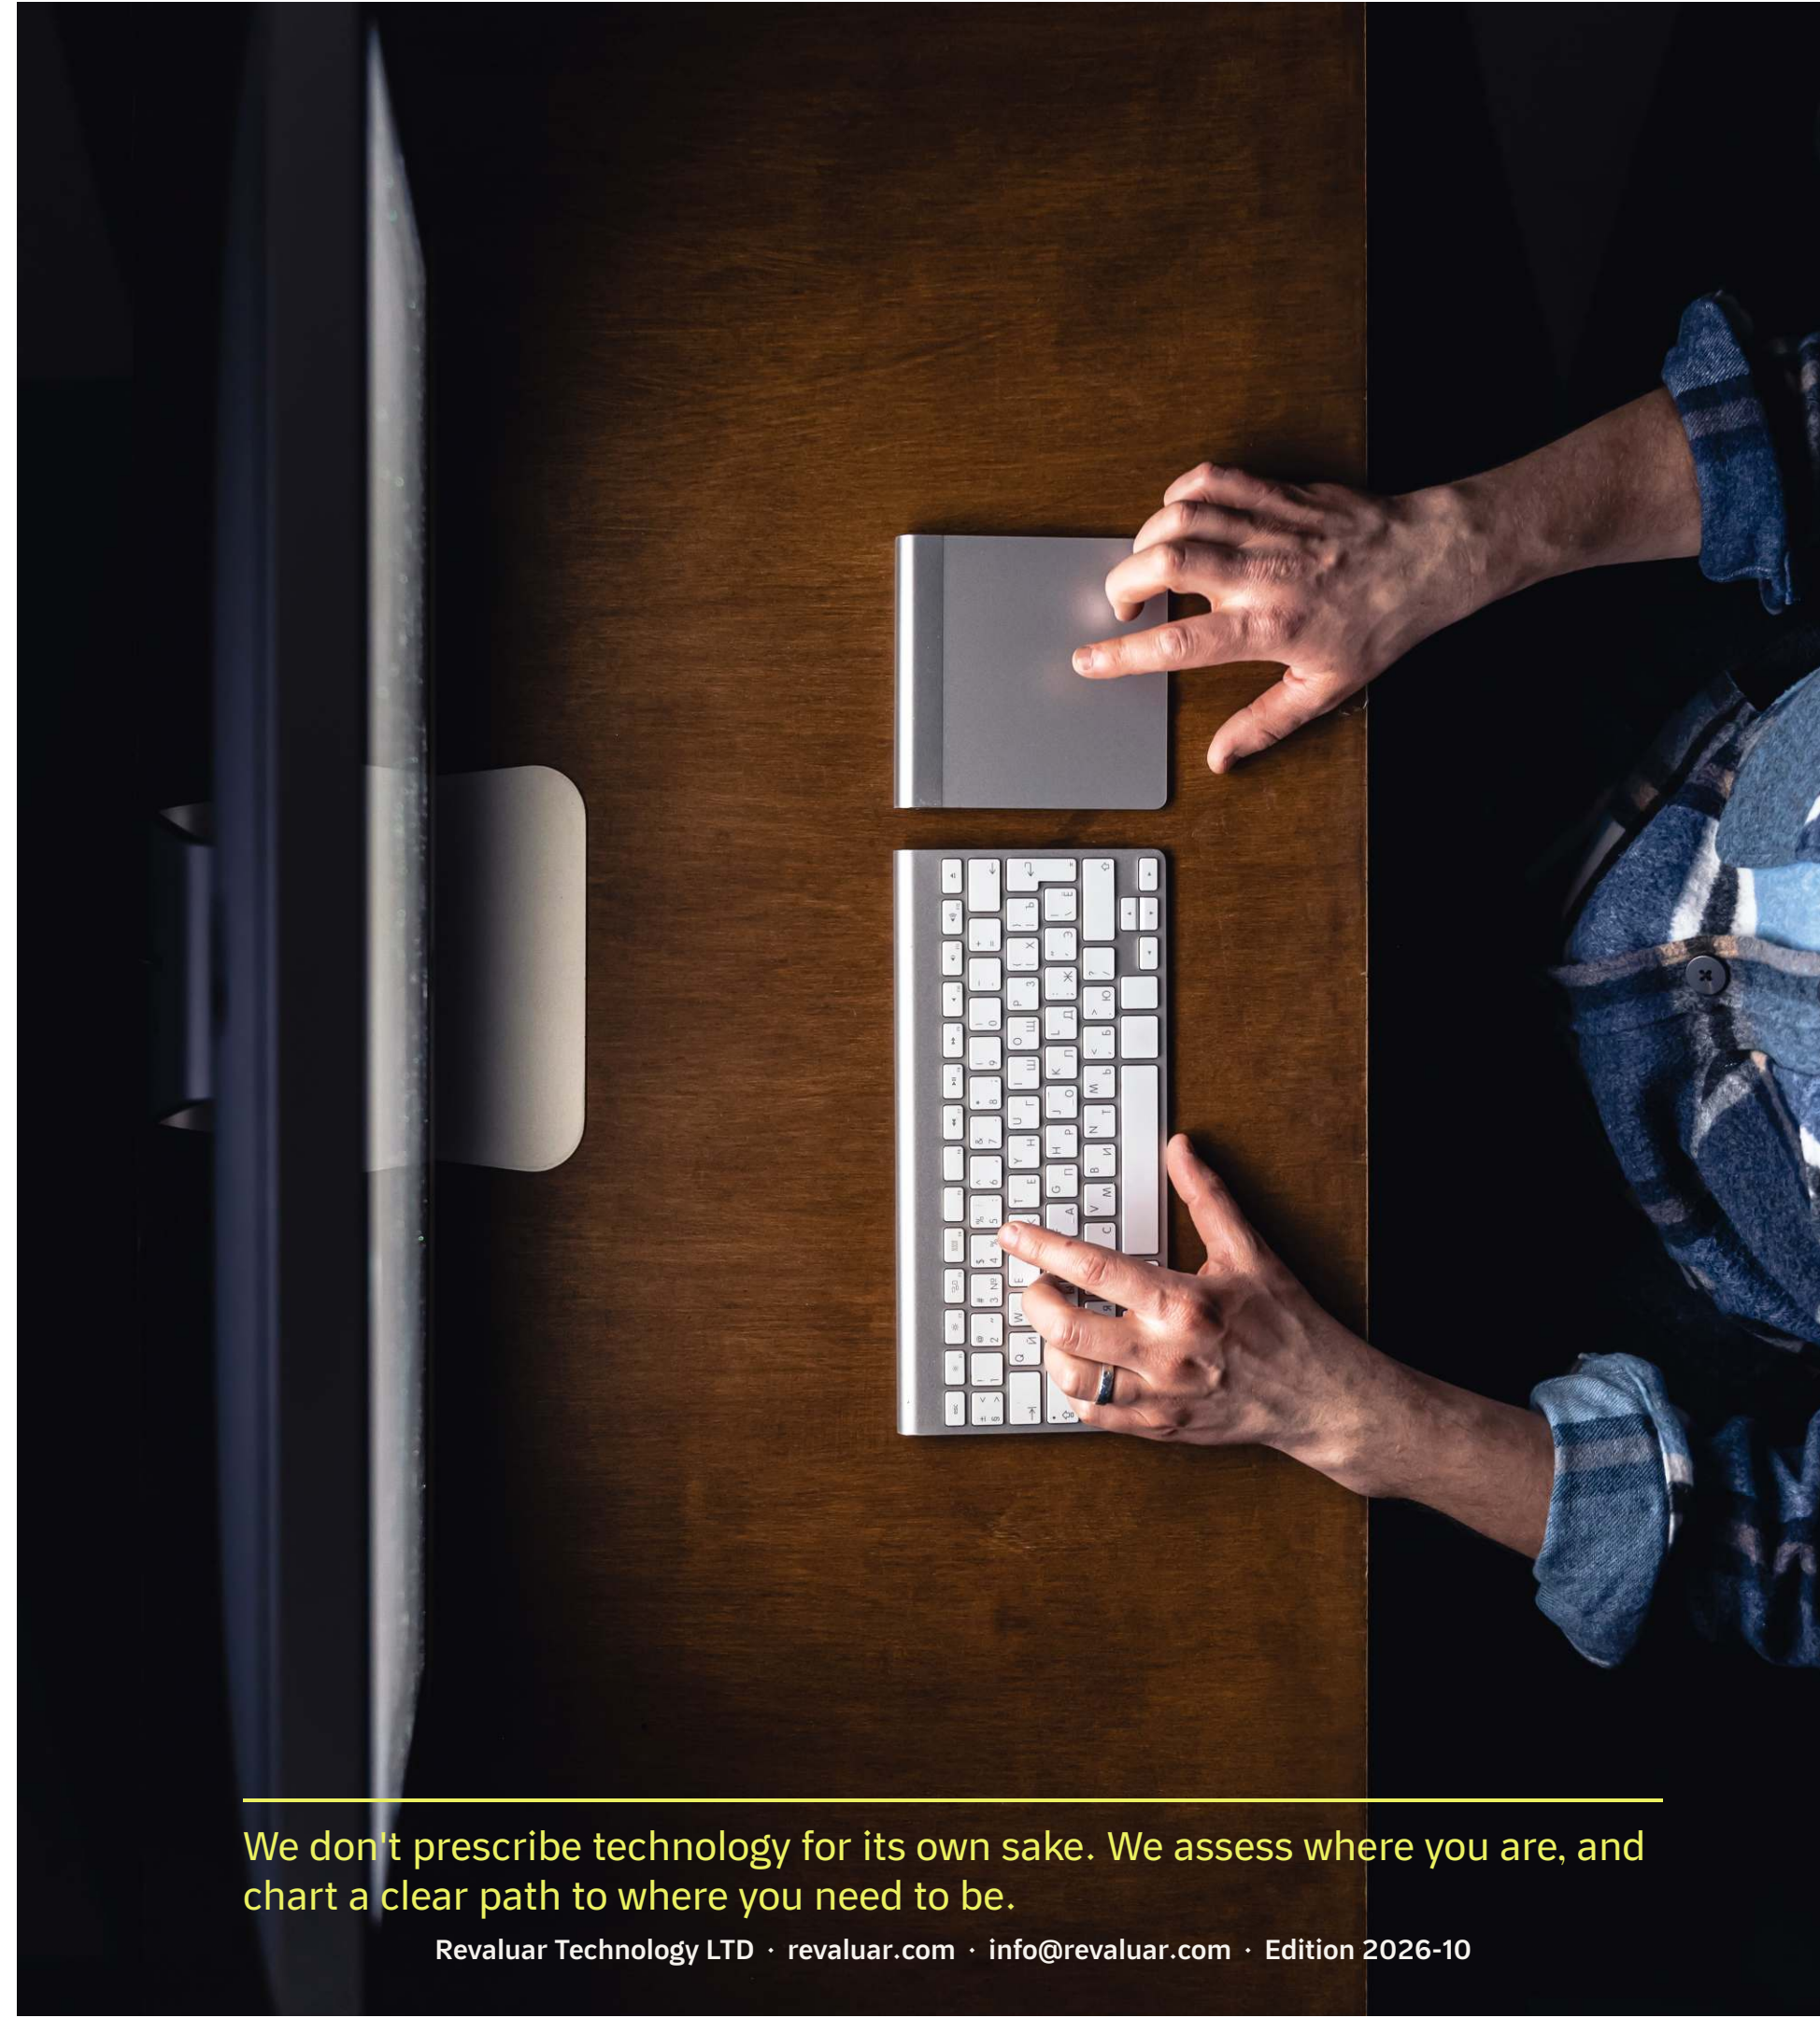

Solution Architecture

Blueprints for modern, scalable systems built to grow with you

Change & Implementation Planning

Frameworks and support that make transformation stick

We don't prescribe technology for its own sake. We assess where you are, and chart a clear path to where you need to be.

Software & Digital Products

We build software that lasts - robust, scalable, and tailored to how your business actually operates.

WHAT WE DELIVER

Web & Mobile Applications

Customer portals, booking & ordering systems, marketplaces & dashboards

Product & Experience Design

UX/UI, design systems & brand identity when needed

APIs & Integrations

Push notifications, QR verification, payments & third-party connections

App Store & Platform Deployment

Full delivery from build to iOS, Android & web release

ERP & Enterprise Systems

ERP is where your operations live, so we treat it as its own discipline, not an add-on to software.

WHAT WE DELIVER

ERP Implementation & Customization

CRM, inventory, finance, HR & POS/KDS workflows

Business Process Automation

Sales, purchasing & operations without the manual handoffs

System Integration

ERP-to-e-commerce, ERP-to-mobile & multi-system data flow

Reporting & Analytics

Data migration, custom modules & operational visibility

AI, Data & Intelligent Automation

Intelligence isn't a product we sell - it's a capability we build into your operations.

WHAT WE DELIVER

AI Agents & Assistants

Customer-service agents & internal knowledge assistants

Private & Enterprise AI

RAG systems and models running on client-controlled infrastructure

Workflow Automation

AI integrated into existing software and document processing

Data Analytics & Dashboards

Pipelines and reporting that inform faster decisions

Every thing Is under

Infrastructure, Networks & Cybersecurity

If the network goes down or the data isn't secure, nothing else we build matters.

WHAT WE DELIVER

Enterprise Networks

Design, LAN/WAN, routing, wireless & multi-site connectivity

Cloud & On-Premise Infrastructure

Hybrid environments, virtualization, backups & disaster recovery

Cybersecurity

Firewalls, IAM, MFA, access policies & security audits

Monitoring & DevOps

Deployment pipelines, logging & continuous operations

Built for international markets.

RTL interfaces

Online payments

SMS / OTP

Multi-currency

Ongoing support

Cloud

Multi-language

App-store deployment

Multi-language, multi-currency and right-to-left ready from day one.

PROJECT PORTFOLIO - 01

Watan Barbershop

Barbershop Website & Online Booking · Vancouver, Canada

A neighbourhood barbershop with a site built around one job: getting a chair booked. A service menu with prices, the barber roster, and online reservations with walk-ins still welcome.

Website

Online Booking

Service Menu

Brand Character

Mobile-First

PROJECT PORTFOLIO - 02

Private Enterprise AI

AI Operating on Client-Controlled Infrastructure

A local AI assistant running on the client's own hardware - private, secure, and fully integrated into daily operations.

- On-Prem
- Private AI
- Infrastructure
- Security
- AI Integration

Client confidential · running on the client's own hardware

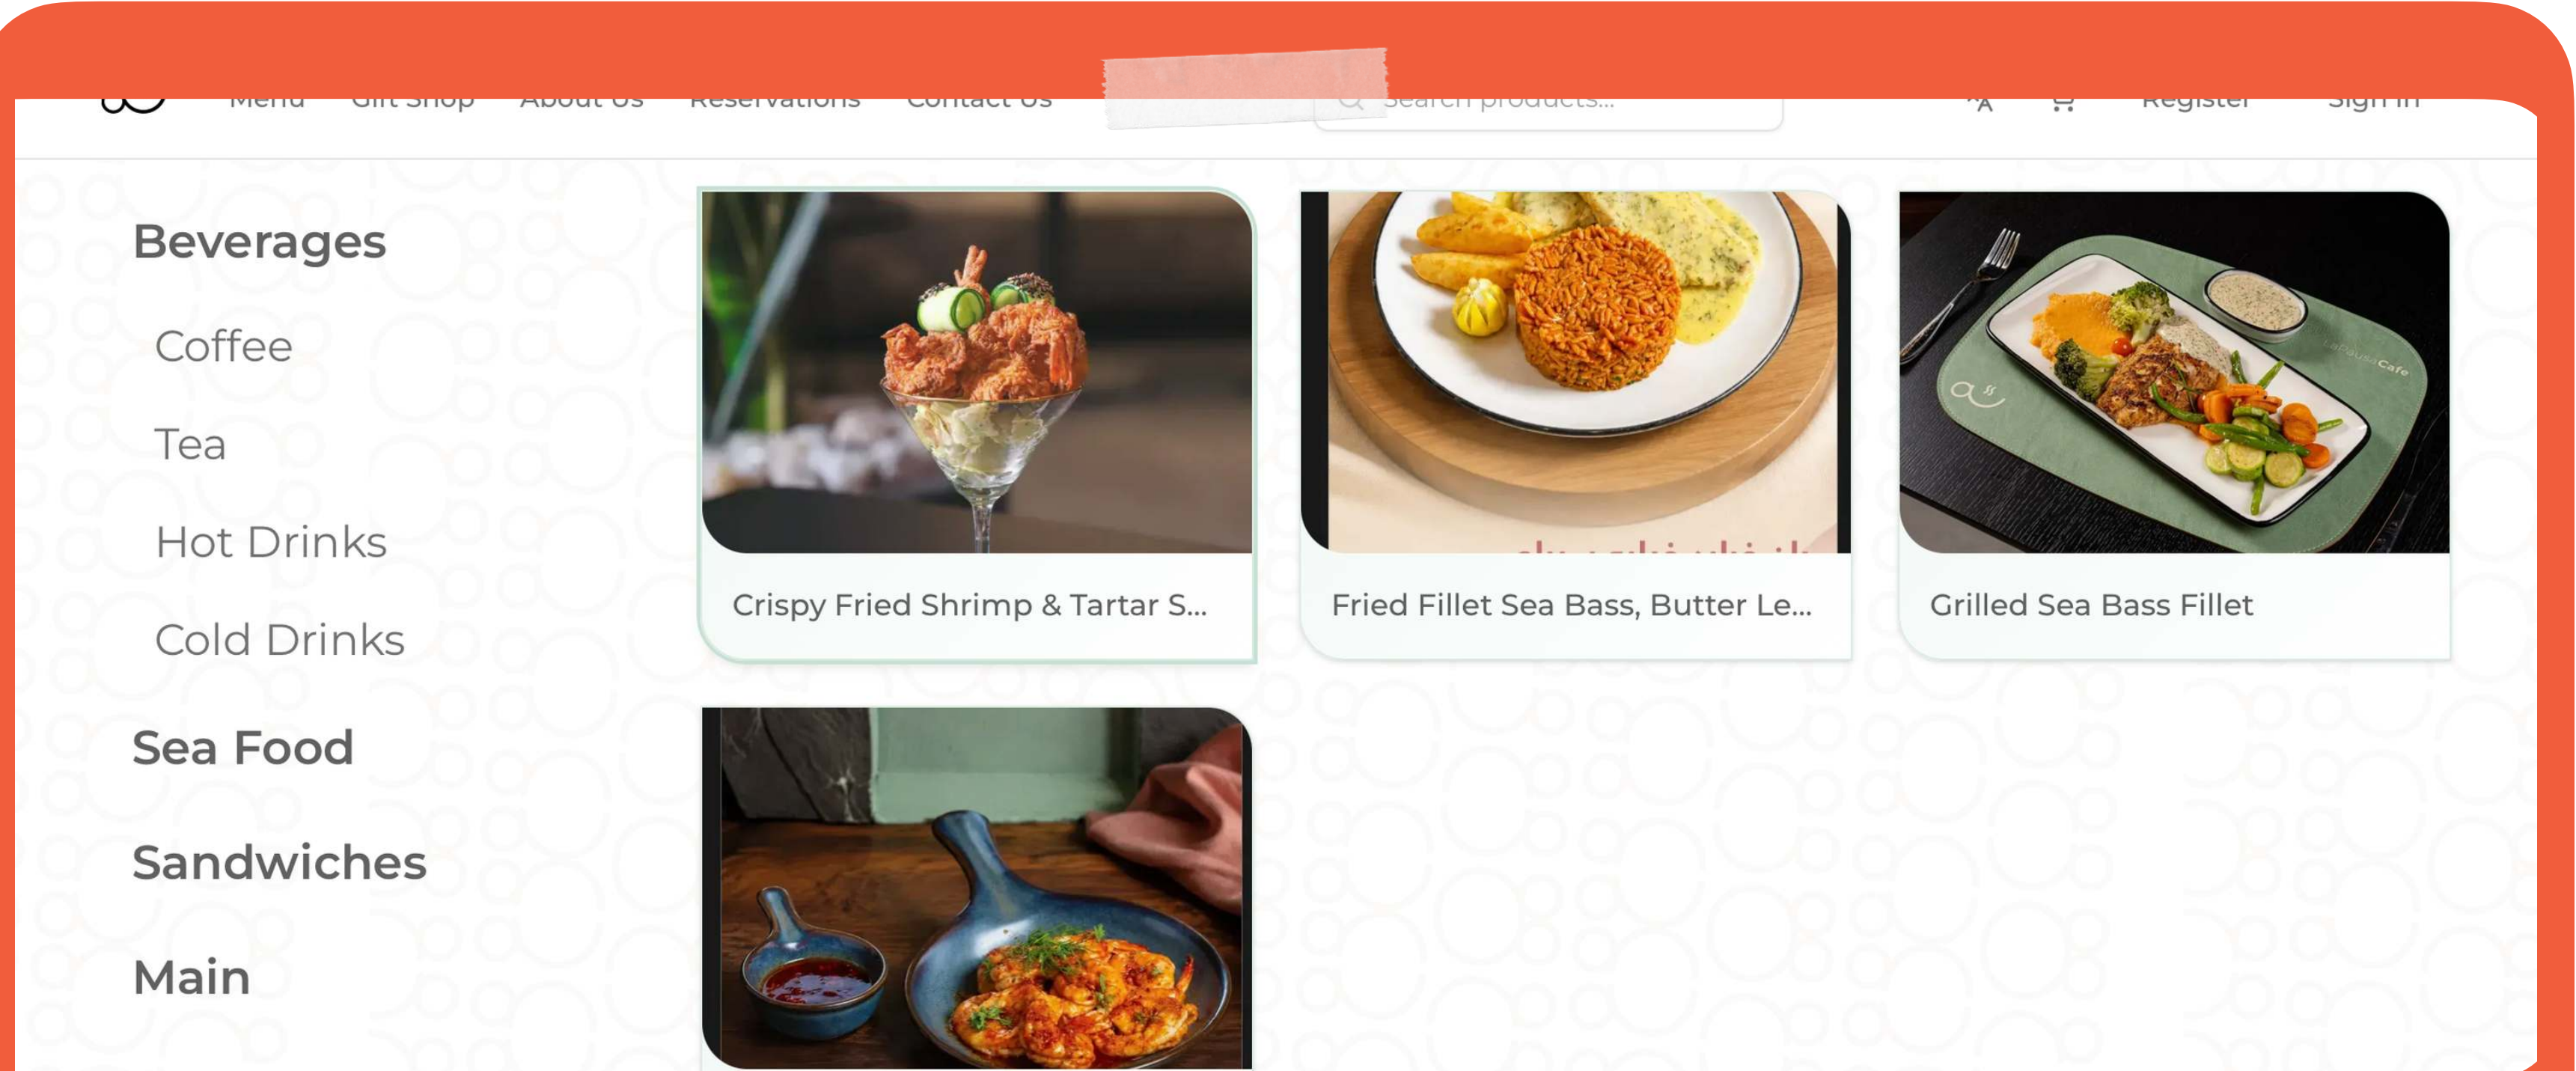

PROJECT PORTFOLIO - 03

LaPausa

Digital Hospitality Ecosystem

A live consumer platform spanning ordering, reservations, commerce and AI - not just a website.

- Mobile Ordering
- Reservations
- AI Assistant
- Commerce
- Payments
- UX/UI
- KDS
- Delivery

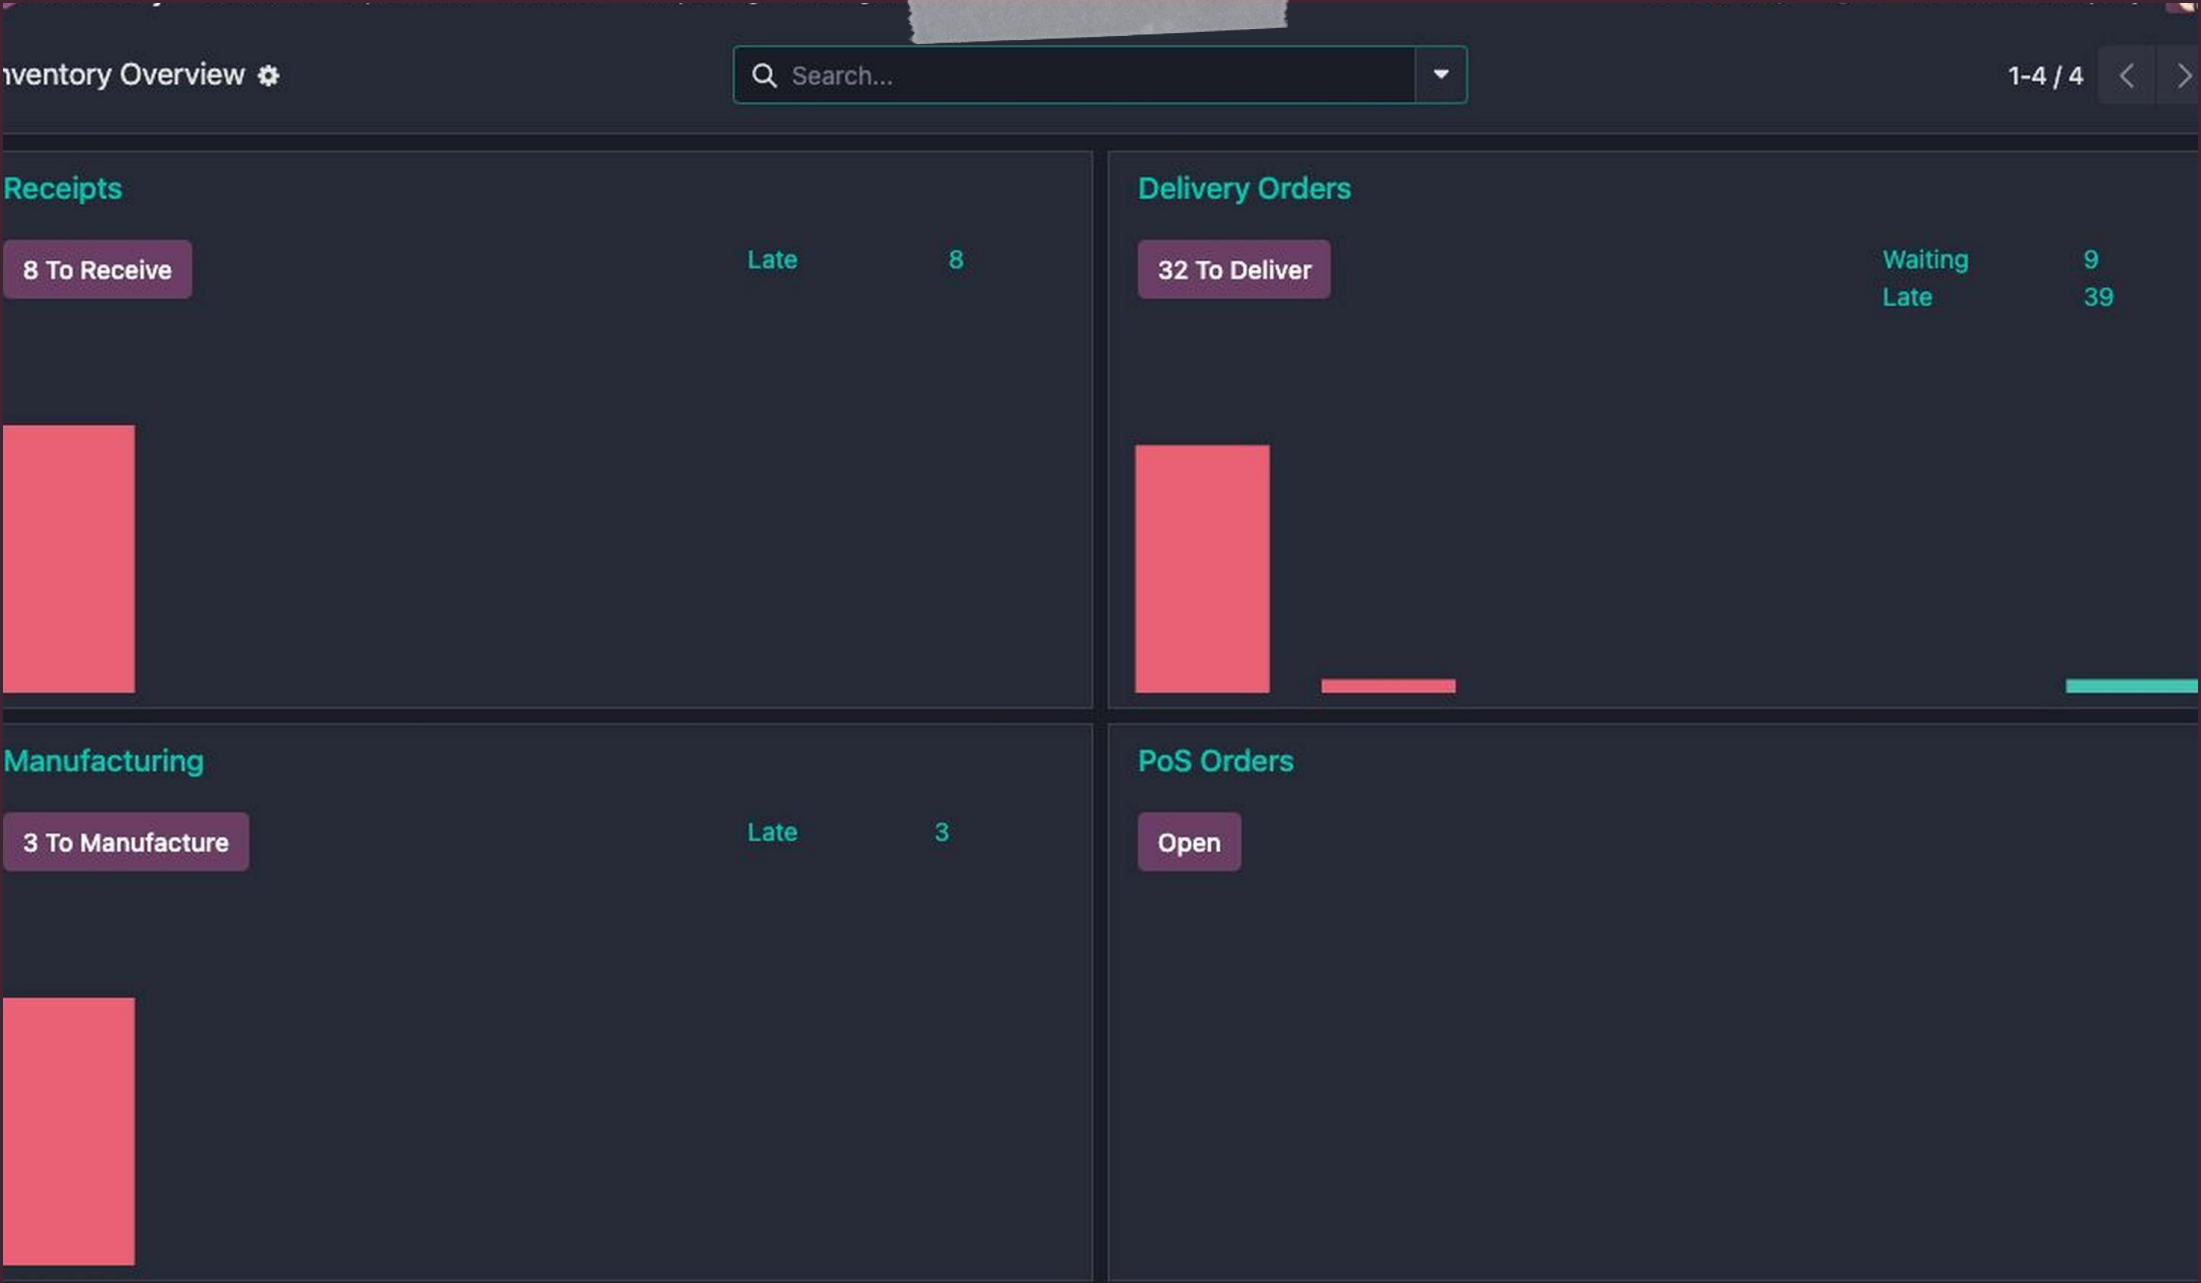

PROJECT PORTFOLIO - 04

Spinor

Digital Commerce & ERP Platform

An Odoo-powered commerce platform with customer accounts and payments - ERP and storefront in one system.

- ERP
- E-Commerce
- Payments
- Digital Fulfilment
- Accounts
- Security
- Integrations

SECTION THREE

How We Work

03

From challenge to impact - four clear steps.

01

Understand deeply

DISCOVER

We immerse ourselves in your world - your goals, constraints, and users - before proposing a single solution.

02

Shape the solution

DESIGN

Strategy, architecture, and experience design come together into a clear blueprint before any execution begins.

03

Execute with precision

BUILD

Agile delivery, transparent communication, and relentless quality focus - from first sprint to final launch.

04

Grow continuously

EVOLVE

We stay with you beyond launch - optimizing, scaling, and evolving your digital capabilities as your needs grow.

SECTION FOUR

Why Revaluar 04

WHAT SETS US APART

Strategy before software. Outcomes before output.

Engineering Depth

We start with strategy, then build with real engineering - software, ERP, AI and infrastructure under one roof.

Global Delivery

Delivery for clients worldwide - multilingual products and one team across time zones.

End-to-End Delivery

From the first strategy session to post-launch support - one partner, full accountability, no handoffs.

Revaluar

"We design, build, and secure the systems organizations run on - so they can innovate with confidence."

Let's build Your future together
